

Betofix R4 SR

Fibre-reinforced PCC/SPCC (RM/SRM) for the static repair of concrete structures

Constituents

VOC content

does not contain

Directive 2004/42/EC ("Decopaint" Directive)

not applicable

Biocidal agents

does not contain

SVHC as per Regulation 1907/2006/EC ("REACH")

Does not contain (<0.1%)

Heavy metals pursuant to VdL Guideline 01

Not contained as constitutive ingredients

GISCODE

ZP1

Eco-labels, certificates, declarations

Guideline VdL 01

Free from plasticisers and aromatic compounds

Building certificates

Suitability as per DGNB Criterion ENV 1.2 - "Local environmental impact"

Nr.	Place of use	Product type	QS1	QS2	QS3	QS4
3	Coatings on predominantly mineral interior substrates such as concrete, brickwork, mortar and filler (e.g. concrete filler). Not intended for floors with special durability requirements (e.g. OS systems) and traffic routes such as underground car parks and access roads, as well as fair-faced or decorative screeds.	Dust-binding coatings, base coats e.g. concrete contact, barrier layer	Yes	Yes	Yes	Yes
5	Coatings for exterior mineral surfaces, e.g. concrete, masonry, mineral mortar and filler, render, WVDS, wall coverings (facade coverings), gypsum plasterboard, etc.	At present, this includes decorative paints and dispersion insulation adhesives	Yes	Yes	Yes	Yes

Suitability as per BNB Criterion

No.	Construction product group	Construction product type	QN1	QN2	QN3	QN4	QN5
4	Filling compounds (including Q filling), dust-binding coatings/primers (in accordance with Decopaint Directive, Cat. G + H), protective coatings for concrete (resistant to oil, acid, water, etc.)	Coatings on predominantly mineral interior surfaces: Concrete, brickwork, mortar, filler (including dispersion filler), plaster, non-woven fabric, gypsum plasterboard, etc.	Yes	Yes	Yes	Yes	Yes

[nachhaltigkeit_qng_kriterium]

[LANG_POS]	Construction product group	Construction product type	QNG
5.3	Filling compounds (including Q filling), dust-binding coatings/primers	Coatings on predominantly mineral interior surfaces: Concrete, brickwork, mortar, filler (including dispersion filler), plaster, gypsum plasterboard, etc.	Yes
