# Safety data sheet

according to 1907/2006/EC, Article 31

Printing date 07.12.2022

Version number 11 (replaces version 10)

Revision: 07.12.2022

SECTION 1: Identification of the substance/mixture and of the company/undertaking

# 1.1 Product identifier

Trade name Anti-Insect

Article number: 2059, 2060

 1.2 Relevant identified uses of the substance or mixture and uses advised against No further relevant information available.
 Application of the substance / the mixture Wood treatment

Email: sales@remmers.co.ukk

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier: Remmers GmbH Bernhard-Remmers-Str. 13 D-49624 Löningen / Germany Mar Tel.: +49(0)5432/83-0 Fax: +49(0)5432/3985 Information department: Product Safety department: Phone: +44 (0) 1293 594 010

Remmers (UK) Limited Unit 4 , Lloyds Court Manor Royal, Crawley – West Sussex RH10 9QU fon +44 (0) 1293 594 010 fax +44 (0) 1293 594 037

# 1.4 Emergency telephone number:

National Poisons Information Service (NPIS): In England and Wales: NHS 111 - dial 111 In Scotland: NHS 24 - dial 111

24h-Transport Emergency Contact Phone Number: within USA and Canada: 1-800-424-9300 outside USA and Canada: 001-703-527-3887

**SECTION 2: Hazards identification** 

#### 2.1 Classification of the substance or mixture Classification according to Regulation (EC) No 1272/2008

Asp. Tox. 1H304 May be fatal if swallowed and enters airways.Aquatic Acute 1H400 Very toxic to aquatic life.

Aquatic Chronic 1 H410 Very toxic to aquatic life with long lasting effects.

2.2 Label elements Labelling according to Regulation (EC) No 1272/2008 The product is classified and labelled according to the GB CLP regulation. Hazard pictograms

Signal word Danger

Hazard-determining components of labelling:Alkanes, C10-13Hazard statementsH304 May be fatal if swallowed and enters airways.H410 Very toxic to aquatic life with long lasting effects.Precautionary statementsP101If medical advice is needed, have product container or label at hand.

Printing date 07.12.2022

Version number 11 (replaces version 10)

Revision: 07.12.2022

# Trade name Anti-Insect

		(Contd. of page 1)
P102	Keep out of reach of children.	
P260	Do not breathe vapours.	
P262	Do not get in eyes, on skin, or on clothing.	
P273	Avoid release to the environment.	
P301+P330+P331	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.	
P391	Collect spillage.	
P405	Store locked up.	
P501	Dispose of contents/container in accordance with local/regional/natio	nal/
	international regulations.	

#### Additional information:

EUH066 Repeated exposure may cause skin dryness or cracking.

EUH208 Contains permethrin (ISO). May produce an allergic reaction.

2.3 Other hazards

#### Results of PBT and vPvB assessment

**PBT:** Not applicable.

vPvB: Not applicable.

**SECTION 3: Composition/information on ingredients** 

#### 3.2 Mixtures

Description: Mixture of the substances listed below with harmless additions.

Dangerous components [% w/w]:		
EC number: 918-481-9 Index number: 649-327-00-6 Reg.nr.: 01-2119457273-39- XXXX	Alkanes, C10-13 Asp. Tox. 1, H304, EUH066	≥85-100%
CAS: 34590-94-8 EINECS: 252-104-2 Reg.nr.: 01-2119450011-60- XXXX	(2-methoxymethylethoxy)propanol substance with a Community workplace exposure limit	≥5-<10%
CAS: 52645-53-1 EINECS: 258-067-9 Index number: 613-058-00-2	permethrin (ISO) Aquatic Acute 1, H400 (M=1000); Aquatic Chronic 1, H410 (M=1000); Acute Tox. 4, H302; Acute Tox. 4, H332; Skin Sens. 1, H317	≥0.1-≤0.25%

#### Additional information

Benzene content: < 0,1% Note P is applicable. It is not necessary to classify nor to mark the product as carcinogenic.

For the wording of the listed hazard phrases refer to section 16.

**SECTION 4: First aid measures** 

# 4.1 Description of first aid measures

#### **General information**

Pyrethroids can cause paresthesia (burning and tingling of the skin without irritation). If symptoms persist: seek medical advice.

After inhalation Seek medical treatment in case of complaints.

After skin contact If skin irritation continues, consult a doctor.

After eye contact Rinse opened eye for several minutes under running water.

After swallowing Seek immediate medical advice.

4.2 Most important symptoms and effects, both acute and delayed

Headache

Dizziness

Gastro-intestinal symptoms

Danger Danger of pulmonary oedema.

**4.3 Indication of any immediate medical attention and special treatment needed** No further relevant information available.

# **SECTION 5: Firefighting measures**

5.1 Extinguishing media Suitable extinguishing agents Foam Page 3/9

# Safety data sheet

according to 1907/2006/EC, Article 31

# Trade name Anti-Insect

(Contd. of page 2) Fire-extinguishing powder Water spray jet 5.2 Special hazards arising from the substance or mixture May be released in case of fire Carbon monoxide (CO) Nitrogen oxides (NOx) Formation of poisonous gases during heating or in fires. 5.3 Advice for firefighters **Protective equipment:** Wear self-contained breathing apparatus. Wear full protective suit. Put on breathing apparatus. Additional information Cool endangered containers with water spray jet. Collect contaminated fire fighting water separately. It must not enter drains. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations. SECTION 6: Accidental release measures 6.1 Personal precautions, protective equipment and emergency procedures Ensure adequate ventilation Keep away from ignition sources Put on breathing apparatus.

6.2 Environmental precautions:

Do not allow to enter the ground/soil.

Prevent from spreading (e.g. by confining or oil barrier).

Do not allow product to reach sewage system or water bodies.

Inform responsible authorities in case product reaches bodies of water or sewage system.

# 6.3 Methods and material for containment and cleaning up:

Send for recovery or disposal in suitable containers.

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose of contaminated material as waste according to item 13.

Ensure adequate ventilation.

# 6.4 Reference to other sections

See Section 7 for information on safe handling

See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

# **SECTION 7: Handling and storage**

# 7.1 Precautions for safe handling

Use only in well ventilated areas.

Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air). Ensure good ventilation/exhaust in workplaces. Avoid the formation of aerosols.

Information about protection against explosions and fires:

Fumes can combine with air to form an explosive mixture.

Keep breathing equipment ready.

#### 7.2 Conditions for safe storage, including any incompatibilities Storage

Requirements to be met by storerooms and containers: No special requirements. Information on storage in a common storage facility:

Store away from oxidising agents.

Store away from food.

# Further information about storage conditions:

Store container in a well ventilated position. Protect from frost.

Keep container tightly closed.

Page 4/9

# Trade name Anti-Insect

(Contd. of page 3)

SECTION 8: Exposure controls/personal protection
8.1 Control parameters
Components with limit values that require monitoring at the workplace:
CAS: 34590-94-8 (2-methoxymethylethoxy)propanol
$W[\Gamma]$ long term values 200 mg/m <sup>3</sup> E0 nnm

WEL Long-term value: 308 mg/m<sup>3</sup>, 50 ppm

Additional information: The lists that were valid during compilation were used as a basis.

# 8.2 Exposure controls

Appropriate engineering controls No further data; see item 7.

# Individual protection measures, such as personal protective equipment

## General protective and hygienic measures

Do not eat, drink or smoke while working.

Apply solvent-resistant skin protection preparation before beginning work.

Be sure to clean skin thoroughly before pauses and after work.

Keep away from food, beverages and animal feed.

Wash hands before pauses and after work.

Do not inhale gases / vapours / aerosols.

The following indication regarding the personal protective equipment are to be considered as suggestions. The selection of the necessary personal protective equipment is to be evalutated by the employer depending on the types of operations and the local circumstances. If a risk assessment onsite shows that there is no risk for employees, the personal protective euiqment is not required or the amount of the PPE can be adpated accordingly.

## **Respiratory equipment:**

Filter A/P2.

The wearing time limits regulated in BGR 190 (use of breathing apparatus) must be observed. The wearing of respiratory protection in the spray application of solvent-based wood preservatives is recommended by the trade association wood and metal, s. BGI 736 (wood preservatives, handling and safe working).

In case of brief exposure or low pollution load, use respiratory protection equipment with filter. In case of intensive or longer exposure, use self-contained respiratory protection equipment.

# Hand protection

Chemical protective gloves may only be worn longer than 4 hours in exceptional cases. Already regular wearing of protective gloves> 2 hours (so-called wet work) obliges the employer to send an offer of occupational health check-ups to the employee.

Protective gloves.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

# Material of gloves

# Nitrile rubber, NBR

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

# Penetration time of glove material

The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

**Eye**/face protection Safety glasses recommended during refilling. **Body protection:** Protective work clothing.

**SECTION 9: Physical and chemical properties** 

1 Information on basic physical and chemical properties General Information	
Physical state	Fluid
Colour:	According to product specification

**SECTION 10: Stability and reactivity** 

10.1 Reactivity No further relevant information available.

# Safety data sheet

according to 1907/2006/EC, Article 31 Version number 11 (replaces version 10)

Printing date 07.12.2022

# Trade name Anti-Insect

Revision: 07.12.2022

(Contd. of page 5)

# 10.2 Chemical stability

# Thermal decomposition / conditions to be avoided:

No decomposition if handled and stored according to specifications.

10.3 Possibility of hazardous reactions No dangerous reactions known

**10.4 Conditions to avoid** No further relevant information available.

10.5 Incompatible materials: No further relevant information available.

**10.6 Hazardous decomposition products:** No dangerous decomposition products known

# **SECTION 11: Toxicological information**

**11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008 Acute toxicity:** Based on available data, the classification criteria are not met.

# LD/LC50 values that are relevant for classification:

Alkanes,	C10-13	
Oral		>5,000 mg/kg (rat)
Dermal	LD50	>5,000 mg/kg (rat)
Inhalative	LC50/4 h	>20 mg/l (rat)

Skin corrosion/irritation: Based on available data, the classification criteria are not met. Serious eye damage/irritation: Based on available data, the classification criteria are not met. Sensitisation: Based on available data, the classification criteria are not met. Germ cell mutagenicity: Based on available data, the classification criteria are not met. Carcinogenicity: Based on available data, the classification criteria are not met.

Reproductive toxicity: Based on available data, the classification criteria are not met.

STOT-single exposure: Based on available data, the classification criteria are not met.

STOT-repeated exposure: Based on available data, the classification criteria are not met.

Aspiration hazard: May be fatal if swallowed and enters airways.

# 11.2 Information on other hazards

# **Endocrine disrupting properties**

None of the ingredients is listed.

# **SECTION 12: Ecological information**

# 12.1 Toxicity

Aquatic toxicity: No further relevant information available.

- 12.2 Persistence and degradability No further relevant information available.
- 12.3 Bioaccumulative potential No further relevant information available.
- **12.4 Mobility in soil** No further relevant information available.

# 12.5 Results of PBT and vPvB assessment

PBT: Not applicable.

vPvB: Not applicable.

#### 12.6 Endocrine disrupting properties

The product does not contain substances with endocrine disrupting properties.

12.7 Other adverse effects

Remark: Very toxic for fish

#### Additional ecological information:

#### General notes:

Do not allow product to reach ground water, bodies of water or sewage system, even in small quantities.

Do not allow product to reach ground water, bodies of water or sewage system.

Hazardous to drinking water even if extremely small quantities leak into soil.

Also toxic for fish and plankton in bodies of water.

Very toxic for aquatic organisms

# **SECTION 13: Disposal considerations**

# Recommendation

Must be specially treated in compliance with official regulations.

The given refuse codes are recommendations based upon the intended use of the product. Because of special use and disposal conditions at the user's, other codes may apply under other conditions.
