- Restoration Mortar SK -

Mineral stone substitution mortar for seamless feathering

Strength	Grain size	Availability		
		Quantity per pallet	32	30
		Size / Quantity	15 kg	25 kg
		Type of container	Plastic bucket	PE bag
		Container code	15	25
		Art. no.		
Special colours, car	be made hydrophobic			
normal	fine ≤ 0.2 mm	0597		
normal	medium ≤ 0.5 mm	0598		
normal	coarse ≤ 2.0 mm	0599		
soft	fine ≤ 0.2 mm	0591		
soft	medium ≤ 0.5 mm	0592		
soft	coarse ≤ 2.0 mm	0593		
Special configuration	ons with regard to composit	ion and characteristic values		
individual	individual	0596		
Minimum order quantity Minimum order quantity	he same article may lead to slight r for special colours: 30 kg r for 25 kg PE bags: 600 kg			
pplication rate		. 1.6 kg/l void		
approx 1,6 kg	Apply t	o a large enough trial area to determin	e the precise amount required.	
CAVITY				

Property profile

- Low free alkali content
- Can be processed, outgoing to "zero"
- Washable
- Good flank adhesion
- Low inherent stress
- UV-resistant pigmentsCan be made hydrophobic
- Characteristic data of the product

	Bulk density	Approx. 1.5 - 1.7 kg/dm ³		
	Water requirement	Consistency: for direct application Fine 0.2 mm: approx. 2.46 I/15 kg and 4.1 I/25 kg Medium 0.5 mm: Approx. 2.16 I/15 kg and 3.6 I/25 kg Coarse 2.0 mm: Approx. 1.8 I/15 kg and 3.0 I/25 kg		
	Shrinkage deformation DIN 52450	After 7 days: approx0.2 mm/m After 28 days: approx0.6 mm/m		
	Flexural strength	Normal approx. 3.5 N/mm ² Soft approx. 2.5 N/mm ²		
	Compressive strength	Normal < 13 N/mm² Soft < 8 N/mm²		
	E-modulus (DIN 1048)	Normal approx. 11 kN/mm² Soft approx. 5 kN/mm²		
	Maximum grain size	Fine 0.2 mm Medium 0.5 mm Coarse 2.0 mm		
	The values stated represent typical cl	haracteristic data of the product and are not to be understood as binding product specifications.		
Possible system products	 Antihygro (0616) Color LA Historic (6476) ZM HF ^[basic] (0220) RM GM M10 (0638) 			
Preparation	Substrate requirements Clean, dust-free and capable of supporting a load.			
	 Substrate preparation Any necessary cleaning measures should be performed as gently as possible, e.g. by spraying with cold or h water or steam cleaning; stubborn dirt should preferably be cleaned using the rotec soft blasting method or Remmers cleaning products (e.g. Clean FP, Clean AC basic, Clean WR). Preserve valuable heritage ornamental elements and statues by carefully removing encrusted dirt and using the appropriate Remmers Stone Strengthener to carry out repeated intensive strengthening. 			
Production of the mixture $ \begin{array}{c} $	 Mixing Pour water into a clean container and add dry mortar. Mix thoroughly for approximately 3 minutes until the proper consistency for working has been achieved. Maturing time approx. 2 minutes Mix again and, if needed, add a small quantity of water. 			
Directions	-	r and substrate: from min. +5 °C to max. +30 °C. ile high temperatures decrease the working and setting time.		
	matt damp substrate. Apply mortar in layer thickness contact layer, 1 to 2 mm above Joints in the masonry must be r After sufficient hardening (whe	arry (dry mortar/water) in a layer thickness of approx. 2 mm on the pre-wetted, es from "zero" (depending on maximum grain size) to 3 cm wet-on-wet in the the final surface. maintained. In the grain pops), roughen the surface or scrape down to the final surface. Ing a scraper or abrasion tool) onto the structure surrounding the defective area.		
Tips on use	If necessary, remove excess m The type and duration of the re Slight deviations in colour betw	nust not be made workable again by adding either water or more wet mortar. aterial from the stone surface with a firm sponge (e.g. latex sponge). working and surface treatment will influence the colour. yeen different batches are possible. gainst frost, rain and drying out too quickly for at least 4 days. pplying subsequent layers.		

Technical Data Sheet Product number 0596	RM pro	
Notes	May contain traces of pyrite (iron sulphide). Do not use on gypsum-based substrates. The characteristic data of the product were calculated under laboratory conditions at 20°C and 65% relative humidity. Low chromate content in accordance with Directive 2003/53/EC. The mixing water must be of drinking water quality. Special colour according to colour number (MF no., colour swatches, NCS etc.) or submitted sample (in the case of changing or alternating colours, clearly mark the desired colour). The colour that is obtained after drying and hardening depends on the ambient conditions and the processing method. For instance, a freshly smoothed surface will be lighter than one that is smoothed later or roughened. Different grain sizes of the same product may lead to slight differences in colour. Substrates soaked from the back may cause discolouration. Always set up a trial area/trial areas first. Alkaline binders may cause a dissolution process on non-ferrous metals. Current regulations and legal requirements must be taken into account and deviations from these must be agreed separately. The relevant test certificates must be observed when planning and carrying out work.	
Tools / Cleaning	Mixing tool, trowel, smoothing trowel Clean tools with water while the material is still fresh. Remmers tools Mischgefäß (4030) Collomix® Stirrer KR (4292) Smoothing Trowel (4004) Glättkelle (4117) Smoothing Trowel Duo (4118)	
Storage / Shelf life	If stored in an unopened container and in a dry place, the product will keep for approx. 12 months.	
Safety data / Regulations	For further information on the safety aspects of transporting, storing and handling the product and on disposa and environmental matters, please see the current Safety Data Sheet.	
Disposal	Larger quantities of leftover product should be disposed of in the original containers in accordance with the applicable regulations. Completely empty, clean containers should be recycled. Do not dispose of together wit household waste. Do not allow to enter the sewage system. Do not empty into drains.

Technical Data Sheet Product number 0596

Please note that the data and information given above have been calculated as guidelines in the laboratory and from real-life experience and are therefore not binding as a basic principle.

This information is therefore of a general nature only and describes our products and how they are used and worked with. In this respect, it must be borne in mind that the varied and diverse nature of the

prevailing working conditions, materials used and construction sites encountered means that not every individual case can be covered. In this respect, we therefore recommend either conducting tests or liaising with us in the event of any doubt. Unless we have provided express written assurance of the products' specific suitability or characteristics in respect of a contractually stipulated intended use, any technical application-related advice or instruction will never

be binding, even though it is provided to the best of our knowledge In all other respects, our general terms and conditions of sale and delivery shall apply.

When a new version of this Technical Data Sheet is published, it shall replace the previous version.
