Technical Data Sheet Product number 0611

## Funcosil FC Historic

Silane-based impregnation in cream form with limited capillary inhibition

	Availability		
	Quantity per pallet	32	
	Size / Quantity	12,5 l	
	Type of container	Plastic bucket	
	Container code	13	
	Art. no.		
	0611		
Application rate	Depending on the porosity, in one coat: approx. 0.15 - 0.20 l/m² Apply to a large enough trial surface (1-2 m²) to determine the precise amount of impregnation agent required.		
150-200 ml Total ⊥ ↓ ↓ ↓ 1m <sup>2</sup>			
Range of use	Driving rain protection for monuments and listed buildings		
•	<ul> <li>Mineral building materials such as render, brick and natural stone</li> <li>Reduction in capillary water uptake while preserving residual capillarity</li> </ul>		
Property profile	Reduces the w-value		
	Enables water vapour diffusion No water vapoling offect		
	<ul> <li>No water repelling effect</li> <li>Outstanding penetration</li> </ul>		
	UV-resistant		
	Alkali-resistant		
	<ul><li>With a mineral water base</li><li>Can be applied sparingly, with absolute precision and with no losses</li></ul>		
		solute precision and with no tosses	
Characteristic data of the	Carrier material		
	Carrier material	Dearomatised hydrocarbons/water	
	Carrier material Density (20 °C)	Dearomatised hydrocarbons/water Approx. 0.825	
	Carrier material	Dearomatised hydrocarbons/water

Funcosil FC Historic

	Perform any necessary cleaning gently, e.g. by spraying with cold or warm water or by steam-cleaning; use rotec soft whirl jet technology or Remmers cleaning products (e.g. Traffic Film Remover (0671), Clean FP (0666), Clean AC (0672), Combi WR (0675)) on tough stains.
Directions	Conditions for use Temperature of the material, air and substrate: from min. +10 °C to max. +25 °C.
≤ +25 °C 2 +10 °C	Apply the impregnation agent with a suitable tool, working crosswise, or by airless spraying.
Tips on use	Take appropriate measures to protect adjacent building elements and materials that should not come into contact with the product. Protect freshly treated surfaces from driving rain, wind, sunlight and condensation. Remove any excess impregnation agent within 1 hour using V 101 thinner.
Notes	Deviations from applicable regulations must be agreed separately. The relevant test certificates must be observed when planning and carrying out work. Carry out a quantitative analysis of aggressive salts if there are any salts present that could damage building materials. High concentrations of harmful salts can cause major structural damage that impregnation cannot prevent. The level of absorption is crucial for the impregnation agent to work at its best. This depends on the respective pore volume and moisture content of the building material. Testing effectiveness: The water absorption of mineral building materials can be determined using the Funcosil Test Tube developed by Professor Karsten (Funcosil Facade Testing Kit, article no. 4954). Testing can only be carried out at the earliest 6 weeks after application. A test of effectiveness needs to be carried out on carbonaceous natural stone. Always set up a trial area/trial areas first.
Tools / Cleaning	Long-pile lamb's wool roller, brush. Airless nozzle: 40° spraying angle, bore hole 0.021 inches, max. 60 bar spraying pressure Tools must be clean and dry. Clean tools with water after use and before any lengthy interruptions to work.
	Remmers tools> Funcosil Prüfröhrchen (4928)> Funcosil Test-Set (4954)> Diagnosekoffer für Mauerwerkssanierung (4953)> Flächenstreicher (4540)> Farbrolle FC (4913)> Teleskopstiel (4391)> Rollerbügel (4449)> Heizkörperpinsel (4541)
Storage / Shelf life	If stored unopened in its original container in a cool, dry place and protected against frost, the product will keep for at least 12 months. Use the contents of open containers as quickly as possible.
Personal protective equipment	Respiratory protection with at least an A/P2 combination filter must be worn during spraying, together with safety goggles. Wear suitable protective gloves and clothing.
Disposal	Larger quantities of leftover product should be disposed of in the original containers in accordance with the applicable regulations. Completely empty, clean containers should be recycled. Do not dispose of together with household waste. Do not allow to enter the sewage system. Do not empty into drains.
