Technical Data Sheet Product number 1639

Induline ZW-508

High-build, clear intermediate coating for spray application

Colour	Availability			
	Quantity per pallet	96	22	
	Size / Quantity	5 l	20 l	
	Type of container	Tin bucket	Tin bucket	
	Container code	05	20	
	Art. no.			
clear	1639			
Application rate	125 - 175 ml/m² per coat (corresponds to: wet film thickness: 125 - 175 μm, dry film thickness: 40 - 60 μm)			
125-175 ml ↓ ↓ ↓ 1m ²				
Range of use	For use on interior and exterio	or wood		
	 Soft and hard woods Dimensionally stable wood bu For use by professionals 	ilding elements: e.g. doors, windows and sh	utters	
Property profile	 Excellent flow properties Excellent build on the surface Excellent sanding properties 			
H ₂ 0	 Contains UV blockers for a long Particularly suitable for coatin 			
Characteristic data of the product	Viscosity (20 °C; 29 s-1)	Approx. 6000 mPas		
	Binder	Acrylate resin		
	Density (20 °C)	Approx. 1.03 g/cm ³		
	Odour	Characteristic		
		Characteristic characteristic data of the product and are not to be	understood as binding product specifications.	
Preparation	The values stated represent typical of Substrate requirements The substrate must be clean, of the substrate must be clean.		es, and prepared in the correct manner.	
Preparation	The values stated represent typical of Substrate requirements The substrate must be clean, or Dimensionally stable wood bu Substrate preparation If necessary, impregnate non-nand product information before	characteristic data of the product and are not to be dry, free of dust, grease and loose substance ilding elements: wood moisture content 11- resistant woods with a wood preservative* (es, and prepared in the correct manner. 15% (*Use biocides safely. ilution of the product, excessively high moisture levels in the wood, or failure to observe the recommended g procedure, application quantities and drying times may reduce the lifespan of the coating film. ry: after approx. 1 hour for sanding and overcoating: after approx. 4 hours e values at +20 °C and 65% relative humidity. mperatures, poor ventilation and high humidity delay drying. ng atter if necessary (max. 5%). puilding elements which have been treated with an intermediate coating should not be exposed to ering until a finishing coat has been applied. g compounds must be compatible with the coating and may only be applied once the coating has dried ghly.

se sealing profiles that are free of plasticisers.	
Hand spray gun, automatic spraying equipment Clean tools with water or Aqua RK-898 Cleaning Concentrate immediately after use. Ensure that any residue from cleaning is disposed of correctly.	
If stored unopened in its original container in a cool, dry place and protected against frost, the product will keep for at least 12 months.	
For further information on the safety aspects of transporting, storing and handling the product and on disposal and environmental matters, please see the current Safety Data Sheet.	
Respiratory protection with at least an A/P2 combination filter must be worn during spraying, together with safety goggles. Wear suitable protective gloves and clothing.	
Larger quantities of leftover product should be disposed of in the original containers in accordance with the applicable regulations. Completely empty, clean containers should be recycled. Do not dispose of together with household waste. Do not allow to enter the sewage system. Do not empty into drains.	
2	

Please note that the data and information given above have been calculated as guidelines in the laboratory and from real-life experience and are therefore not binding as a basic principle.

This information is therefore of a general nature only and describes our products and how they are used and worked with. In this respect, it must be borne in mind that the varied and diverse nature of the prevailing working conditions, materials used and construction sites encountered means that not every individual case can be covered. In this respect, we therefore recommend either conducting tests or liaising with us in the event of any doubt. Unless we have provided express written assurance of the products' specific suitability or characteristics in respect of a contractually stipulated intended use, any technical application-related advice or instruction will never be binding, even though it is provided to the best of our knowledge. In all other respects, our general terms and conditions of sale and delivery shall apply.

When a new version of this Technical Data Sheet is published, it shall replace the previous version.
