

## FL fix rapid

Flexible, fast-setting tile cement

| Colour  | Availability  |           |  |
|---|---|-----------|--|
|   | Quantity per pallet                                     | 42        |  |
|   | Size / Quantity   | 25 kg     |  |
|   | Type of container                                       | Paper bag |  |
|   | Container code  | 25        |  |
|   | Art. no.  |           |  |
| grey  | 2866  |           |  |
|   |   |           |  |
| Application rate                                    | Approx. 1.1 kg/m²/mm coating thickness                  |           |  |
| 1,1 kg/<br>mm thickness<br>↓ ↓ ↓<br>1m <sup>2</sup> | At 4 mm approx. 1.6 kg/m <sup>2</sup>                   |           |  |
|   | At 6 mm approx. 2.3 kg/m²<br>At 8 mm approx. 2.9 kg/m²  |           |  |
|   |   |           |  |
| Range of use  | Laying ceramic wall and floor coverings                 |           |  |
|   | For interior and exterior use                           |           |  |
|   | Dry, wet and underwater environments                    |           |  |
|   | Levelling of substrates with unevenness up to 5 mm      |           |  |
|   | Substrates with increased deformation behaviour         |           |  |
| Property profile                                    | High adhesive pull strength (C 2)                       |           |  |
|   | Flexible (S 1)  |           |  |
|   | Fast setting (F)  |           |  |
|   | Ready for foot traffic and grouting after approx. 3 hou | Irs       |  |
|   | High slip resistance (T) and bond strength              |           |  |
|   | Extended open time (E)                                  |           |  |

Characteristic data of the product

|                           | Deformability   | > 2.5 mm (S 1)   |  |
|---------------------------|---|--|--|
|                           | Bulk density  | Approx. 1.2 kg/dm <sup>3</sup>   |  |
|                           | Water requirement   | Approx. 25%, equivalent to 6.25 l/25 kg  |  |
|                           | Foot traffic/ready for use  | After approx. 3 hours  |  |
|                           | Load-bearing capacity (20<br>°C)  | After approx. 24 hours   |  |
|                           | Cement bed thickness  | Up to max. 5 mm  |  |
|                           | Open time   | Up to 30 minutes (dependent on temperature)  |  |
|                           | The values stated represent typi<br>product specifications.   | ical characteristic data of the product and are not to be understood as bindi  |  |
| Possible system products  | <ul> <li>Remmers tile grouts</li> <li>Remmers flooring compounds</li> <li>Remmers waterproofing slurries</li> <li>Remmers joint sealants</li> <li>Primer Hydro F (2842)</li> </ul>                            |  |  |
| Preparation               | Substrate requirements<br>Clean, dust-free and capable of supporting a load.  |  |  |
|                           | <ul> <li>Substrate preparation         Remove projecting seams and mortar remains.         Level the substrate.         Pretreat highly absorbent substrates with Primer Hydro F (Art. 2842).     </li> </ul> |  |  |
| Production of the mixture | Mixing<br>Pour water into a clean container and add dry mortar.<br>Mix thoroughly with a mixer for approx. 3 minutes until homogeneous.   |  |  |
| Directions                | Conditions for use<br>Temperature of the material, air and substrate: from min. +5 °C to max. +30 °C.<br>Low temperatures increase, while high temperatures decrease the working and setting<br>time.         |  |  |
|                           | Working time (+20 °C)<br>Approx. 60 minutes   |  |  |
|                           | Apply the product directly<br>Lay the surface covering or   | ull strength, apply a scratch coat (contact layer) first.<br>using a suitable toothed trowel.<br>n the wet mortar bed, pushing down gently.<br>e from the top of the surface covering promptly.<br>n the joint network.  |  |
| Tips on use               | Once it has hardened, mor<br>more wet mortar.<br>When using with heated flo<br>beneath the floor covering   | ly exposed to sunlight or on heated surfaces.<br>tar must not be made workable again by adding either water or<br>poring, a closed layer of mortar 2 mm thick must be created<br>in order to ensure correct functioning.<br>ghtly adhering old surface coverings, apply a scratch coat |  |

|                               | before laying the new covering.   |
|-------------------------------|---|
| Notes                         | Low chromate content in accordance with Directive 2003/53/EC.<br>The characteristic data of the product were calculated under laboratory conditions at<br>20°C and 65% relative humidity.<br>The mixing water must be of drinking water quality.<br>Deviations from applicable regulations must be agreed separately.<br>The relevant test certificates must be observed when planning and carrying out work. |
| Tools / Cleaning              | Mixing tool, finishing trowel, toothed scraper, trowel or smoothing trowel  |
|                               | Clean tools with water while the material is still fresh.   |
| Storage / Shelf life          | If stored in an unopened container and in a dry place, the product will keep for approx. 12 months.   |
| Safety data / Regulations     | For further information on the safety aspects of transporting, storing and handling the product and on disposal and environmental matters, please see the current Safety Data Sheet.  |
| Disposal                      | Larger quantities of leftover product should be disposed of in the original containers in accordance with the applicable regulations. Completely empty, clean containers should be recycled. Do not dispose of together with household waste. Do not allow to enter the sewage system. Do not empty into drains.  |

2866

Cementitious mortar for elevated requirements with reduced slippage and extended open time (class C2 FTE S1)

| Reaction to fire:                       | class E         |
|---|-----------------|
| Initial tensile adhesion strength:      | ≥ 1.0 MPa (C 2) |
| Tensile adhesion strength after water   | ≥ 1.0 MPa (C 2) |
| immersion:                              |                 |
| Tensile adhesion strength after thermal | ≥ 1.0 MPa (C 2) |
| ageing:                                 |                 |
| Tensile adhesion strength after heat    | ≥ 1.0 MPa (C 2) |
| freeze/thaw cycles:                     |                 |
| Open time: tensile adhesion strength    | ≥ 0.5 MPa       |
| Extended open time: tensile adhesion    | ≥ 0.5 MPa       |
| strength                                |                 |
| Slipping:                               | ≤ 0.5 mm        |

Please note that the data and information given above have been calculated as guidelines in the laboratory and from real-life experience and are therefore not binding as a basic principle.

This information is therefore of a general nature only and describes our products and how they are used and worked with. In this respect, it must be borne in mind that the varied and diverse nature of the prevailing working conditions, materials used and construction sites encountered means that not every individual case can be covered. In this respect, we therefore recommend either conducting tests or liaising with us in the event of any doubt. Unless we have provided express written assurance of the products' specific suitability or characteristics in respect of a contractually stipulated intended use, any technical application-related advice or instruction will never be binding, even though it is provided to the best of our knowledge. In all other respects, our general terms and conditions of sale and delivery shall apply.

When a new version of this Technical Data Sheet is published, it shall replace the previous version.
