

Aqua VA-092 Thickener Additive

Additive for increasing the hiding power of water-based coating systems in spray application

Availability	
Quantity per pallet	480
Size / Quantity	
Type of container	Plastic box
Container code	83
Art. no.	
7249	■

Application rate 1.5 vol-% on the ready-mixed coating material

Range of use

- Increasing the hiding power of water-based coating systems
- Coating of higher layers in one working step (e.g. facades)

Property profile

- Final viscosity after short curing time (15 min.)
- High storage stability of the manufactured mixture
- Easy use

Characteristic data of the product

Colour	brownish, no influence on colour shade if dosed correctly
Density	1.1 g/ml
Odour	Charakteristic

The values stated represent typical characteristic data of the product and are not to be understood as binding product specifications.

Possible system products > [Aqua ML-69/sm 3 in 1 Multi-Purpose Varnish \(7250\)](#)

Production of the mixture

■ **Mixing**
 Stir or shake in 1.5 vol-% for at least 2 minutes
 300 ml of additive are matched to 20 litres of coating material

Directions

■ **Conditions for use**
 Temperature of the material, air and substrate: from min. +10 °C to max. +25 °C.
 See the Technical Data Sheet for the coating material used.

Tips on use

Use only for spray application
 Do not use for iron mica
 Adding the product may affect the chemical and technical characteristics of the varnished surface.
 Use the contents of open containers as quickly as possible.

Tools / Cleaning

Patent disperser, tumbler, Collomix BIAx 35
 Clean the tools with water immediately after use.

Storage / Shelf life

If stored unopened in its original container in a cool, dry place and protected against frost, the product will keep for at least 12 months.

Safety data / Regulations

For further information on the safety aspects of transporting, storing and handling the product and on disposal and environmental matters, please see the current Safety Data Sheet.

Disposal

Larger quantities of leftover product should be disposed of in the original containers in accordance with the applicable regulations. Completely empty, clean containers should be recycled. Do not dispose of together with household waste. Do not allow to enter the sewage system. Do not empty into drains.

Biocidal Products Regulation

Contains a biocidal product (in-can preservative) with the biocidal agents CMIT/MIT (3:1) for protecting the container content from deterioration by microbial organisms (germs, yeast, etc.). Please note the processing guidelines carefully!

Please note that the data and information given above have been calculated as guidelines in the laboratory and from real-life experience and are therefore not binding as a basic principle.

This information is therefore of a general nature only and describes our products and how they are used and worked with. In this respect, it must be borne in mind that the varied and diverse nature of the

prevailing working conditions, materials used and construction sites encountered means that not every individual case can be covered. In this respect, we therefore recommend either conducting tests or liaising with us in the event of any doubt. Unless we have provided express written assurance of the products' specific suitability or characteristics in respect of a contractually stipulated intended use, any technical application-related advice or instruction will never

be binding, even though it is provided to the best of our knowledge. In all other respects, our general terms and conditions of sale and delivery shall apply.

When a new version of this Technical Data Sheet is published, it shall replace the previous version.
